SKILLS SUMMARY

- **Languages:** C++ (Intermediate), Python, SQL, R
- **Frameworks:** NumPy, Pandas
- **Tools/Platforms:** Tableau, Git, Github
- **CS Fundamentals:** OOPS, DBMS, OS, Computer Networks, DSA
- **Soft Skills:** Analytical Skills, Collaborative, Project Management, Adaptability

TRAINING

- **GeeksforGeeks – DSA (Self paced)** Jun'2024
Summer Training
 - Completed an intensive self-paced training program focused on foundational and advanced programming concepts.
 - Gained expertise in C++ programming and core Object-Oriented Programming (OOP) principles.
 - Strengthened problem-solving skills by learning key Data Structures such as arrays, linked lists, stacks, queues, trees, and graphs.
 - Explored and implemented Dynamic Programming (DP) and Greedy Algorithms to solve real-world optimization problems.
 - Enhanced a strong understanding of algorithmic efficiency and coding best practices

PROJECTS

- **Placement Prediction | Tech:** R, Flexdashboard, dplyr, rpart, e107 Nov'2024
 - Designed an R-based dashboard to predict student placement status using Naive Bayes and Decision Tree models.
 - Preprocessed data by handling categorical variables and removing irrelevant column.
 - Split the dataset into training and testing sets to evaluate model performance.
 - Visualized the decision tree structure and displayed model evaluation metrics (confusion matrix, accuracy).
 - Added a personalized prediction feature for hypothetical student profiles.
- **Mobile Phone Market Analysis | Tech:** Data Visualization Oct '2024
 - Developed an interactive Tableau dashboard to analyze the smartphone market using a dataset of over 3,000 mobile phone models.
 - Conducted in-depth analysis of key factors such as customer ratings, pricing strategies, storage capacities, and brand performance.
 - Visualized insights like rating distributions, brand-level pricing trends, storage-price relationships, and color availability using dynamic charts (e.g., bar charts, tree maps, and scatter plots).
 - Enhanced decision-making for consumers and businesses by presenting actionable insights into market trends and customer preferences.

ACHIEVEMENTS

- **Completing the 160 Days of Code Challenge on GeeksforGeeks (GFG).** June'2024
- **Participated in a Community Development Program (CDP) and gained teaching experience.** June'2023
- **Solved 200+ problems across various coding platforms, including GeeksforGeeks and LeetCode.** June '2023

CERTIFICATIONS/CERTIFICATES

- Cloud Computing – NPTEL Jul '2024
- Dynamic Programming, Greedy Algorithms – Coursera Jan '2024
- DSA Self Placed – GeeksForGeeks Jul '2024

EDUCATION

- **Lovely Professional University** Punjab, India
Bachelor of Technology – Information Technology; **CGPA: 7.62** Since August 2022
- **High School Kerari Jodhan Bigha, Patna** Patna, Bihar
Intermediate; **Percentage: 82%** April 2018 - March 2020
- **Adarsh Rajkiya UMS Kancha** Kancha, Bihar
Matriculation; **Percentage: 82.8%** April 2016 - March 2017
